

BONDO WIND FARM

PROJECT NEWSLETTER

JUNE 2026

Neoen is investigating the potential to develop a wind farm in the softwood plantations near Bondo, approximately 15-kms east of Tumut. The Bondo plantations are suitable for a potential wind farm because they have: a strong wind resource, three existing transmission lines, and a large network of existing roads

Community Information Sessions

Got questions? Come meet the project team in person this July & August.

[Register to join us at a session near you.](#) Scan the QR Code to secure your spot:

Small groups

12–15 people per session for meaningful conversations.

Ask anything

Raise your own questions and hear those of your neighbours.

Location: Brungle Memorial,
1386 Brungle Rd
**subject to interest & attendance*

*The sessions are also being advertised in the following local papers:
Tumut & Adelong Times; Yass Valley Times; Gundagai Times*

Comings & Goings

We have had a few changes to the Bondo Wind Farm project team in the past month. We farewelled Peter Elrick on June 10th and we welcome Matt Hicks as our new Community Liaison Officer and Aniruddha (Ani) Deshpande as Project Manager. Together with Clemence Soret, they form the core engagement team for the project and welcome any questions from the community.

Wind Farm FAQ's

Question:

How close can wind turbines be placed near a home?

Answer:

In NSW, under the 2024 Wind Energy Guidelines, no wind turbine can be placed closer than 1.9km to a home. Neoen has taken this further for Bondo Wind Farm and will not place a wind turbine closer than 2.1km to a home. The only exception to this would be if a neighbour agreed to a turbine being closer.
